MOHAMMED KARIMULLA

AI/ML Developer | Python | Machine Learning | Data Analysis
Hyderabad, Telangana, India | mdkarimnlr@gmail.com | linkedin.com/in/mdkarimulla

PROFESSIONAL SUMMARY

AI/ML developer with a B.Tech in Electronics and Communication Engineering and a current AI/ML internship at Stackenzo. Hands-on with Python, NumPy, pandas and scikit-learn for data preparation and model building (Linear Regression, Decision Tree, Random Forest). Also build web applications with React, JavaScript and REST APIs. Seeking entry-level AI/ML Engineer, Python Developer or Data Analyst roles, and open to freelance projects.

TECHNICAL SKILLS

Programming: Python, JavaScript, HTML, CSS
AI/ML & Data: NumPy, pandas, scikit-learn, Linear Regression, Decision Tree, Random Forest, data cleaning, feature selection, train-test split, Microsoft Excel
Web: React, REST API integration, responsive web pages
Tools: Git, GitHub, Jupyter Notebook, VS Code
Embedded: ESP32, ultrasonic sensors, hardware validation

EXPERIENCE

AI/ML with Python Intern - Stackenzo Private Limited Jul 2026 - Present
India | Hybrid

- Built and trained Linear Regression models in Python using NumPy, pandas and scikit-learn.
- Cleaned and prepared datasets, applied feature selection and train-test splitting for model training.
- Explored Decision Tree and Random Forest models as part of hands-on machine learning practice.
- Worked within production-oriented AI/ML project workflows alongside the team.

Conceptual CAE Design and Simulation Virtual Intern - Altair / EduSkills Apr 2024 - Jun 2024

- Completed a 10-week virtual internship covering engineering design and simulation concepts.

PROJECTS

Currency Converter Web Application React, JavaScript, REST API

- Developed a React app that fetches live exchange rates from the Frankfurter API.
- Implemented currency selection, conversion logic, state management, loading indicators and error handling.
- Used Git and GitHub for version control.

Machine Learning Practice Python, pandas, scikit-learn

- Prepared data, selected features and built Linear Regression, Decision Tree and Random Forest models.

Smart Side-Collision Prevention System (B.Tech Project) ESP32, Ultrasonic Sensors

- Contributed to sensor integration, hardware validation and response testing for a system that detects nearby objects and raises side-collision alerts.

EDUCATION

B.Tech, Electronics and Communication Engineering - Narayana Engineering College 2021 - 2025
JNTU Anantapur | Grade: A

CERTIFICATIONS

- Introduction to Internet of Things (Elite) - NPTEL, IIT Kharagpur, Jan-Apr 2024
- Cybersecurity Basics - IBM
- Web Development Training - Corizo, Jun-Aug 2025
- Conceptual CAE Design and Simulation Virtual Internship - Altair / EduSkills, 2024
